## DIRECTIONS

## PRODUCT DATA

1. For slow drains...pour one half bottle (16 oz.) slowly down affected drain. Wait 15 minutes then flush with hot tap water. Repeat if necessary.

2. For clogged drains...pour entire contents of bottle (32 oz.) slowly down affected drain. Wait sufficient time to allow drain to clear then flush with hot tap water. Repeat if necessary.

3. For use in garbage disposal drains... follow same instructions for slow or clogged drains. If drain does not clear, do not switch on the disposal to prevent chemical splash back. Consult plumber.

4. Regular drain maintenance...to maintain free running drains; 2-4 ounces per week may be applied to each affected drain.
